

KLK Cryptotoken Sale One-Pager

Tautachrome, Inc. is an emerging company in the blockchain/crypto-currency sector and the augmented-reality/real-imagery technology sector. The Company has high-speed blockchain technologies in view aiming to couple with the Company's revolutionary patents in smartphone image authentication, imagery-based social networking interaction, and augmented reality marketing enabling fast, amount-neutral transactions worldwide.

The Company has developed patented and patent pending technologies using smartphone apps and blockchain technology to automate frictionless KLK cryptocurrency-based transactions between consumers and the more than 200 +million businesses in the global multi trillion dollar goods and services commerce sector. KLK Cryptocurrency symbol: (k).

Tautachrome is launching the KLK cryptocurrency to support a global trade in goods, services and digital information made possible by its newly patented KlickZie technologies, and required to support the immediacy, transparency, security and global reach of this commerce sector. The KLK cryptocurrency will begin life as an ERC20 compliant cryptotoken designated the KLK20 token on the Ethereum blockchain with planned migration in a one for one swap to a cryptotoken on a faster blockchain, or in a one for one swap to a cryptocurrency designated the KLK coin on our own custom high speed fully decentralized blockchain.

The Company has developed two app platforms, KlickZie's Augmented Reality based ArK platform (the "ArKnet") and KlickZie's Activation-based trusted imagery platform. These two platforms implement the cryptocurrency transaction activity in the KLK ecosystem.

- KlickZie ArKs add the blockchain power of frictionless, automated transactions between buyers and sellers in the world of commerce for goods and services of all kinds.
- KlickZie Activated Imagery lets consumers gain for themselves the value of their imagery and their digital information that up to now have been funneled to social network systems.

These platforms give smartphone users consumers the ability to create digital products that employ the KLK ecosystem to generate new income.

The KlickZie ArKnet platform enables sellers of goods and services to deploy Augmented Reality interfaces, which consist of digital information belonging to the seller, that advertises and facilitates the sale of the sellers goods or services using geo-located interfaces branded ArKs that serve the world's goods and services commerce market.

The KlickZie Activated Imagery platform allows the ownership and trustability of consumer imagery and other digital information to be reliably established, permitting consumers to extract profit from their own personal digital information.

Cryptotoken Sale: Eight billion KLK20 cryptotokens will be generated and distributed, 50% to token purchasers in this token offering, and the balance reserved for distribution as follows: 18% for technology development, 10% for development partners in the goods and services commerce sector, 2% for software bug bounties and 20% for prorata distribution over time to the 1,800+ shareholders in the Company.
