KlickZie Token Sale Overview

The KlickZie token (ticker KLK20), an ERC20 compliant cryptotoken issued on the Ethereum blockchain, is the currency of the KlickZie community of smartphone users worldwide. The KLK20 cryptocurrency enables, via KlickZie patented smartphone technologies, smartphone user participation in the \$48 trillion world household consumption of goods and services, and participation in the monetization of the untapped value in the trillions of their own smartphone pictures and videos. This double whammy creates a new ecosystem among consumers based on what people do most, namely supply their needs for goods and services from the worlds several hundred million micro, small and large businesses, and what people love most, namely their smartphone imagery. The KlickZie crypto-ecosystem is being built to transfer wealth into the hands of the consumer and to grow the KLK and KlickZie user base to over a billion users in record time. Rapid user growth will be virally fueled by awarding KLK20s to new KlickZie users as well as to existing users who create new users through referral.

Advantages

Open Network: Built on public, distributed technologies

Open-Source: Anyone can extend and observe

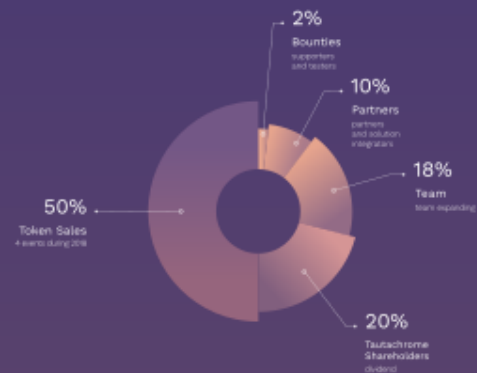

Decentralized: No single point of failure, owner

Auditable: Cryptographic signatures and hashing
